

MD NEW STUDENT ORIENTATION 2022

Office of Admissions and Student Affairs

MOREHOUSE
SCHOOL OF MEDICINE

Entering Class of 2022
Doctor of Medicine
June 30th – July 1st

MD NEW STUDENT ORIENTATION 2022

Dear Morehouse School of Medicine Student:

Our school is graced by an overwhelming number of exceptionally well-qualified applicants. You are in good company and I am delighted to help you begin your journey into the remarkable profession of medicine.

Professional school study is a time of exploration and immersion in your desired specialty. It is a time for the free exchange of ideas, acquisition of new skills, and creation of knowledge. It is a time when faculty will change from being your teachers to being mentors and colleagues.

Morehouse School of Medicine was founded in 1975 as the Medical Education Program at Morehouse College. In 1981, Morehouse School of Medicine became an independently chartered institution and the first established at a Historically Black College and University in the 20th century. Our focus on primary care and addressing the needs of the underserved is critical to improving overall health care.

During the course of my career, I have had the privilege to work in several other major health sciences centers, and I believe our faculty is second to none. Our faculty and staff are committed to exceptional teaching, research and patient care. We will never lose sight of the responsibility to guide, support, and teach. Morehouse School of Medicine has graduated many medical students over the years, and we remain the leading educator of primary care physicians in the United States.

Our medical school is inextricably linked to our principal teaching hospital, Grady Memorial Hospital, and several affiliates: The Atlanta VA, WellStar Atlanta Medical Center, and Children's Healthcare of Atlanta. Grady Memorial Hospital is the largest safety-net hospital in the Atlanta area, from core primary care services for the Atlanta region to complex cutting-edge referral services for patients from all over the world with our students as part of the clinical team. Here at Morehouse School of Medicine, students learn the basics of clinical practice by actually contributing.

We are also excited about the many research and community engagement opportunities afforded our students. Morehouse School of Medicine understands the valuable link among research, community participation, and patient care. As we work to realize our vision to lead the creation and advancement of health equity, we recognize in order to improve health outcomes we must foster innovative research that moves beyond the lab and directly to the patients who need it most.

We are proud of our institution, our facilities and our programs, but it is the people who make it all work. We are enormously proud of our faculty, staff, students, and alumni. I look forward to meeting each of you personally and hearing your story, please let me know if I can help you in any way.

Sincerely,

A handwritten signature in black ink that reads "Valerie Montgomery Rice, MD". The signature is written in a cursive style and includes a small flourish at the end.

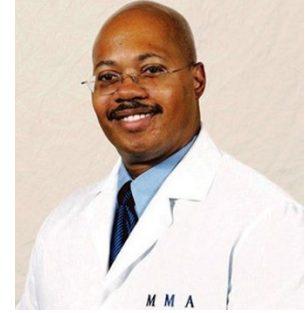

Valerie Montgomery Rice, MD
President and Dean

MD NEW STUDENT ORIENTATION 2022

Greetings MD Entering Class of 2022,

On behalf of the Admissions Team, it is with great pleasure that I welcome you to the Morehouse School of Medicine family!

We look forward to an opportunity to help you navigate your way through the challenging pursuit of your graduate degree. You will find that the faculty, staff, and administrators of MSM have created an environment that is conducive to learning, enhances emotional well-being, and helps in your professional growth. We look forward to assisting you in achieving your full potential.

We understand the challenges of performing well in your coursework, and we hope that our carefully cultivated "user-friendly" approach, provided by our supportive student services team, will aid you in your successful navigation toward obtaining your advanced degree.

Our students have a great sense of purpose and are noted for their outstanding effort, persistence, exemplary academic performance, and true grit. Our students come from various cultures and socioeconomic backgrounds and go on to become scientists and public health professionals who truly embody and carry out the great mission of this school:

"Improving the health and well-being of individuals and communities; increasing the diversity of the health professional and scientific workforce and addressing primary health care needs with emphasis on people of color and the underserved urban and rural populations across Georgia and the nation."

We hope you will take full advantage of what we have to offer, and we look forward to you becoming a student, who embodies the MSM ideals of Excellence, Service, Knowledge, Wisdom, Integrity, and Innovation. Join us as we Lead the Creation and Advancement of Health Equity!

Warmest Regards,

A handwritten signature in black ink, which appears to read 'Franklyn Geary, Jr. MD'. The signature is fluid and cursive.

Franklyn Geary, Jr. MD
Associate Dean of Admissions
Professor of Clinical Obstetrics and Gynecology

MD NEW STUDENT ORIENTATION 2022

Welcome to Morehouse School of Medicine (MSM) where we lead in the creation and advancement of health equity! We are so excited to have you as part of our MSM family. You are not only a student, but you are a health equity warrior! What does that mean? We will educate and guide you to develop the knowledge, skills and attitudes that will allow you to deliver compassionate, culturally competent care to patients and communities, eliminate health disparities and challenge systems and notions that limit people from reaching their optimal health.

Fifteen years ago, I came to MSM as an Assistant Professor of Medicine. MSM's mission was so closely aligned with my personal mission—to serve the underserved—I knew I had found my place and my people. Though I spent most of my early career at MSM in graduate medical education (residents), I have always been utterly impressed by our students. The care and compassion you provide our patients at our clinical sites is unrivaled.

MSM's Office of Student Affairs exists to provide support services, advising, and innovative programs for students. **Our vision: To empower and engage students to reach their full potential. Our Mission:** The MSM Office of Student Affairs advances health equity through providing our diverse group of health care professional students with holistic advisement, guidance and support that is flexible, timely and compassionate helping them to succeed on their educational journey.

Our Core values: Wisdom, Excellence, and Service (MSM core values) and Inclusivity and Compassion. We achieve our mission by focusing on three key areas: Wellness, Engagement, and Resources.

Wellness: We are uniquely attuned to the fact that holistic wellness is a key component to student success. Our Counseling Services office has three counselor's adept at working with students in the graduate education space. In addition, we have a Student Health and Wellness Center just steps away from campus where students can get primary care, vaccinations, health screenings, and mental health services. There is an on-campus fitness center as well as a YMCA across the street. During this upcoming year we will be engaging in an innovative wellness program called "Core Wellness." We are excited to begin this initiative with your incoming class. A Student Wellness Committee will be key in helping us plan wellness-related activities for the upcoming year.

Engagement: There are over 30 student organizations at MSM. The OSA supports these organizations through assisting with events and fundraisers. Student leaders are actively engaged to participate in important campus events. At MSM, we have a highly active and engaged Student Government Association. In addition to sponsoring student events, the SGA sponsors Student Town Hall meetings and the leadership actively advocates student issues and concerns. We also have a Campus Activity Board that sponsors activities for all students and a newly formed Interprofessional Education Council.

Resources: In addition to those resources listed above we actively partner with OSLEP (Academic Student Support Services), Undergraduate Medical Education, The Dean's Office, and the Office of Disability Services to make sure that students have the resources that they need to be successful during their educational journey. During this upcoming year we are excited to build our student advising system and continue and expand our peer support services for our students. We also house the Office of the Registrar that oversees transcript requests, etc.

In closing, we are delighted to have you join us at Morehouse School of Medicine. I look forward to meeting each of you and supporting you on your health care journey!

Sincerely,

Cinnamon D. Bradley, MD

Cinnamon Bradley, MD
Associate Dean of Student Affairs Professor of Medicine
