Webinar: Diabetes in the US Latino Population - A Population Health Perspective

Thursday April 30, 2015 1:00PM EST

[Register Here](#)

The webinar is designed for a national and international audience of public health professionals, health system administrators, clinicians, and students. The primary objective is to highlight the critical importance of understanding the significantly negative impact that diabetes and related complications are imparting on minority and Latino communities.

After participating in this webinar you will:

- 1) Have a better understanding of the significance and impact that diabetes in the US Latino is having and will have on the US health care system and economy.
- 2) Understand the incidence and impact of co-morbid conditions associated with Diabetes in the US Latino communities.
- 3) Understand the economic cost of diabetes in the US Latino community now and for the future generations.
- 4) Understand the sociocultural consequences of diabetes in the US Latino community and families.
- 5) Understand national, regional, and community efforts at addressing the public Health epidemic of diabetes in the US Latino community.
