

Faculty Development Seminar Series

Research Skills Workshop

Strategies for proposal development, establishing timelines, mentoring and coaching

Participants will be able to:

- * Understand the proposal development process
- * Create a realistic workplan/timeline
- * Understand the importance of mentors/coaches and collaborators and their role in research development
- * Identify resources for finding scientific mentors and collaborators

Note: Participants should bring their research aims to the session and be prepared to identify two scientific mentors (individuals whose research interests closely align with those of the attendees)

This activity has been approved for *AMA Category I* credits™
