

Physiology Research Poster Symposium

Morehouse School of Medicine Department of Physiology
Dynamic Research Programs in Cancer Biology, Cardiovascular Disease and Reproductive Health
Innovative Approaches to Graduate and Medical Education

Among Our Presenters.....

Mukaila Akinbami, PhD

Research Instructor
High blood pressure, sleep disorders and cognitive impairment

Dong Liu, PhD

Assistant Professor
Proangiogenic Exosomes from Hypoxic Adipose-Derived Stem Cells

Leonard Anderson, PhD

Assistant Professor
Iroquois Homeobox Gene (Irx3) is Regulated by VEGF Signaling and Modulates Endothelial Cell Migration

William Seffens, PhD

Research Instructor
Computational Physiology applied to Human Diseases using Bioinformatics and High Performance Computing

Methode Bacanamwo, PhD

Associate Professor
Epigenetic regulation of blood pressure and endothelial cell specification/function

Rajagopala Sridaran, PhD

Professor
Ovarian GnRH and its functional significance

Nerimiah Emmett, PhD

Assistant Professor
Biological mechanisms of vascular remodeling in hypertension, pregnancy and cancer

Winston Thompson, PhD

Chair and Professor
Women's Reproductive Health and Disease

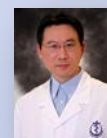

Sharon Francis, PhD

Assistant Professor
Role of Serum and Glucocorticoid Inducible Kinase 1 (SGK1) in Vascular Function and Disease

Xuebiao Yao, PhD

Professor
(Presenter Gregory Adams, Jr., MS) P124-TIP150 regulation in cell migration and its functional relevance of interaction with the cytoskeleton

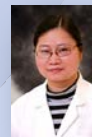

Minerva Garcia-Barrío, PhD

Assistant Professor
Pleiotropic Roles of ASCL3: Implications for Cell Homeostasis and Disease

Xueying Zhao, PhD

Associate Professor
Mechanisms regulation vascular and kidney function in obesity and diabetes

Thursday, January 22, 2015

The Halls of Physiology

Medical Education Building C, 3rd Floor

1:30 pm – 3:00 pm

Refreshments Served MEB C-350

MOREHOUSE
SCHOOL OF MEDICINE
