Interactive STEAM engagement has been proven to be a great model for enhancing student learning and reinforcing existing academic knowledge. Come and join Morehouse School of Medicine's Benjamin Carson Science Academy Summer Camp in a 4-week summer experience for current and rising 5th graders designed to challenge your students' imaginations in science, technology, engineering, arts and mathematics, as well as introducing them to careers in the health professions and biomedical science. Additionally, students will participate in cultural activities and motivational sessions, present science fair projects and meet our medical and graduate students and physicians. Applications are available for new and returning students at www.msm.edu.
