

Hypertension Treatment and Control: Translational Science Insights and the Future of Implementation Research

Lecture Objectives:

- 1. Highlight the remarkable achievements in basic, clinical, and population science research in hypertension treatment and control over the last 50 years.
- 2. Distinguish these achievements with the persisting national and global burden of hypertension, target organ damage, and related health disparities.
- 3. Describe the adverse national and global trends in blood pressure treatment and control.
- 4. Identify unique opportunities for translational research and implementation science for successful control of hypertension.

Keynote Speaker: George A. Mensah, MD, FACC

Director, Center for Translation Research and Implementation Science (CTRIS)

National Heart, Lung, and Blood Institute

National Institutes of Health

Bethesda, MD

Wednesday, October 1, 2014 - 12 Noon Morehouse School of Medicine NCPC Auditorium

Morehouse School of Medicine is accredited by the Accreditation Council for Continuing Medical Education to sponsor continuing medical education for physicians.

The Morehouse School of Medicine designates this live activity for a maximum of 1 AMA PRA Category 1 credit(s) TM . Physicians should claim only the credit commensurate with the extent of their participation in the activity.

Morehouse School of Medicine (MSM) requires instructors, planners, managers and other individuals who are in a position to control the content of this activity to disclose any real or apparent conflict of interest they may have as related to the content of this activity. All identified conflicts of interest are thoroughly vetted by MSM for fair balance, scientific objectivity of studies mentioned in the materials or used as the basis for content, and appropriateness of patient care recommendations.

Following the lecture heavy hors d'oeuvres will be served.

Seating will open at 11:30 am
